Limited Review Report

**To: The Chairman and member of the board of directors of MISR CEMENT (QENA) COMPANY (S.A.E)
(Egyptian Joint Stock Company)**

Introduction:

We have performed a limited review for the accompany separate interim financial statements of MISR CEMENT (QENA) COMPANY (S.A.E) which comprise the separate interim statement of financial position as at 31 March, 2022 and the related separate interim statements of income Separate interim, other comprehensive income Separate interim, change of equity Separate interim and cash flows Separate interim for the three-month then ended, and a summary of significant accounting policies and other explanatory notes. Management is responsible for the preparation and Fair presentation of these separate interim financial statements in accordance with the Egyptian Accounting Standards, our responsibility is to express a conclusion on these separate interim financial statements based on our limited review.

Scope of limited review

We conducted our limited review in accordance with the Egyptian standard on review engagements 2410 "Limited review of separate interim financial statement performed by the independents Auditor of the entity". A limited review of separate interim financial statements consists of making inquiries primarily to persons responsible for financial and accounting matters in the company and applying analytical and other limited review procedures. A limited review is substantially less in scope than an audit conducted in accordance with Egyptian standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express such an audit opinion on these separate interim financial statement.

Conclusion:

Based on our limited review, nothing has come to our attention that causes us to believe that the accompany separate interim financial statements do not present fairly, in all material respect the separate interim financial position of MISR CEMENT (QENA) COMPANY (S.A.E) as at 31 March, 2022 and its financial performance and its cash flow for the three-month ended then, in accordance with Egyptian accounting standards.

- The financial statements have been prepared and presented in Egyptian pound, which is the Company's functional currency.

Misr Cement (Qena) Company (S.A.E)
Separate interim Financial statements For The period Ended March 31, 2022

3. Significant accounting estimates and personal judgments

3.1 The significant estimates and assumptions

The preparation of financial statements according to the Egyptian accounting standards requires that management uses personal judgments and making estimates and assumptions that can affect the application of policies and the values of assets and liabilities also revenues and expenses. The estimates and assumptions are evaluated based on past experience and some other factors including the expected future events that fit these circumstances.

These estimates and assumptions are reviewed yearly and any differences in the accounting estimates are recognized in the year in which these estimates are changed, and if these differences affect the year in which these changes are made and future years, these differences are recorded in the year in which the adjustments are made and the future years. The most significant estimates and assumptions the company uses are as follows:

a. Income tax

The Company is subjected to corporate income tax. The Company estimates the income tax provision by using expert's advice. In case of any difference between any of the final and preliminary results, these differences will affect the income tax and deferred income tax provision in these years.

b. Expected credit loss in value of commercial debtors.

The evaluation in the value of receivables is made through debt aging. The Company management is studying the credit position and the ability of payments of the customers who their numerous debts are due during the credit limit granted for them and the impairment is recorded with the value of the due amounts on the customers who the Company management sees that their credit position do not allow them to pay their liabilities.

c. Useful lives of fixed assets

The estimated useful life is depending on estimation and personal judgment based on the experience of the Company with similar fixed assets taking into consideration the estimated usage of the asset and number of working shifts and technical limitations. Residual values and useful lives of assets are reviewed on yearly basis.

d. Impairment of Inventory

The company's management reduces the obsolete and low turn-over inventory into its net ordinary value based on special reports about its usage and future benefits.

3.2 Significant personal judgments in applying the Company's accounting policies

Applied accounting policies do not require from management the use of personal judgment which may have a significant impact on the value recognized in the financial statements.

3.3 Fair value measurement

- The fair value of financial instruments is identified according to the market value of the financial instruments or similar financial instruments on the date of the financial statements. The value of the financial assets is identified by their replacement cost, while the value of the financial liabilities is identified by the current prices that can settle these liabilities.
- In case there is no active market to determine the fair value of the financial instruments the fair value is estimated using different valuation methods taking in consideration the prices of recent transactions and using the current fair value of other significantly similar instruments-Deducted cash flow method- or any other evaluation method results in values on which we can depend.
- When using the deducted cash flow method as a method of evaluation the future cash flow is estimated based on the best estimates by management. And the used deduction rate is identified based on the prevailing price in the market in the date of the financial statements of instruments similar in nature and conditions.

Misr Cement (Qena) Company (S.A.E)

Separate interim Financial statements For The period Ended March 31,2022

4. Significant accounting policies

The accounting policies set out below have been applied consistently to all years presented in these financial statements.

4.1 Foreign currencies translation

Transactions in foreign currencies are initially recorded using the exchange rate prevailing on the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are retranslated using the exchange rates prevailing at the balance sheet date, All differences are recognized in the statement of income.

Nonmonetary items that are measured at historical cost in foreign currencies are translated using the exchange rates prevailing at the date of the initial recognition.

4.2 Fixed assets and its Depreciation

The first recognition and initial measurement

Fixed assets are stated at the historical cost deducts of accumulated depreciation and accumulated impairment losses.

a. Subsequent Cost

Such cost includes the cost of replacing part of the fixed assets when that cost is incurred, if the recognition criteria are met, Likewise, when major improvements are performed, its cost is recognized in the carrying amount of the fixed assets as a replacement if the recognition criteria are satisfied, All other repair and maintenance costs are recognized in the statement of profit or loss as incurred.

b. Depreciation

Depreciation is determined based on the fixed assets less salvage value as residual value at the end of estimated useful life.

The Salvage value of asset is the net amount currently expected to be obtained as a result of disposal, if it is in the expected condition at the end of its useful life.

The depreciation amount is carried on the income statement according to the straight line method by the useful life estimated to each kind of fixed assets except land that not depreciated, the depreciation of fixed assets are depreciated according to the following rates:

Assets	Depreciation rate
Buildings, constructions and facilities	5% - 6.6%
Machinery and equipment	5% - 10%
Motor vehicles	20%
Tools	10%
Furniture, fixtures and office equipment	10% - 50%

4.3 Intangible assets

The intangible assets are initially recognized at the cost then they are recognized at the cost less the accumulated amortization and the accumulated impairment.

The intangible assets with a definite life are amortized throughout the assets' economic life. An impairment test is made whenever there is an indicator of the assets' impairment. The amortization year and method of the intangible assets with a definite life are revised at least once at the end of each fiscal year.

4.4 Projects under construction

Projects under construction represent the amounts that are incurred for the purpose of constructing or purchasing fixed assets until it is ready to be used in the operation, upon which it is transferred to fixed assets, Projects under construction are valued at cost less impairment.

Misr Cement (Qena) Company (S.A.E)
Separate interim Financial statements For The period Ended March 31, 2022

4. Significant accounting policies (followed)

4.5 Investments in subsidiaries and associates

Investments in subsidiaries and associates are recorded at cost less losses of its impairment, in subsidiaries are accounted for at cost including transaction cost and in case the investment is impaired, the carrying amount is adjusted by the value of this impairment and is charged to the Income Statement for each investment separately.

4.6 Financial investments at fair value through OCI

Available for sale investments are initially recognized at cost After initial measurement, available for sale investments are measured at fair value with unrealized gains or losses recognized directly in equity until the investment is derecognized, at which time the cumulative gain or loss recorded in equity is recognized in the statement of income, or determined to be impaired, at which time the cumulative loss recorded in equity is recognized in the statement of income, if the fair value of an equity instrument cannot be reliably measured, the investment is carried at cost

4.7 Inventory

The Inventory elements are valued as follows:

- a) Raw materials, gasoline, mazot, packaging and spare parts: at the lower of cost (using the weighted average method) or net realizable value.
- b) Work in progress: at the lower of the cost of production based on the cost sheets or net realizable value.
- c) Finished goods: at the lower of the cost of production based on the cost sheets or net realizable value.

Cost of production includes unit's share of direct materials, direct labor and both direct and indirect overheads.

Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

The amount of any write down of inventories to net realizable value and all losses of inventories shall be recognized in cost of sales in the statement of Income statement in the year the write down or loss occurs, The amount of any reversal of any write down of inventories, arising from an increase in net realizable value, shall be recognized as reduction of cost of sales in the statement of Income statement in the year in which the reversal occurs.

4.8 Revenue

- Sales

Revenue from sale is recognized at the fair value after deducting returns, commercial and quantity discounts. The revenues are recognized at the transfer of risks and returns of goods to the purchaser and at the presence of enough expectation about the flow of economic benefits in the sale transaction and in case of the company didn't hold the right of continuous managerial interference on goods to the purchaser at the receipt of goods, and in case of exporting the risks and returns of sold goods ownerships are identified based on the freight conditions as the revenue usually recognized when the goods are loaded on the truck.

- Dividends

Revenue is recognized when the company's right to receive the payment is established.

- Interest income

Revenue is recognized as interest incurred using the effective interest method.

4.9 Expected Credit Loss

- The company has two types of financial assets that are subject to the expected credit losses model according to this methodology:
 - a. Customer balances and notes receivables generated from services to customers
 - b. Contract principles related to the company's contracts with customers
- The company applies the simplified approach to the impairment of financial assets in accordance with the Egyptian Accounting Standard No. (47) Financial Instruments in order to measure expected credit losses, which uses a provision for expected credit losses over the life time of all customer balances and contract assets with customers
- To calculate the ECL, we depended on the customer and contract assets with customers balances as a group based on common credit risk characteristics and the number of days past due. Where the assets of the contract with the customer relate to the work in progress that has not been invoiced and has the same risk characteristics as customer balances for the same types of contracts Accordingly, the company concluded that the expected credit loss rates for customer balances are a reasonable approximation of the expected credit loss rates for the assets of contracts with customers

Misr Cement (Qena) Company (S.A.E)

Separate interim Financial statements For The period Ended March 31, 2022

Translation of financial statements
Originally issued in Arabic

4. Significant accounting policies (followed)

4.9 Expected Credit Loss (followed)

- ECL rates depended on analyzes of sales payments over the 36 months before December 31, 2021 and the corresponding historical credit losses incurred during this period.
- The default rate calculated through this approach and used to calculate ECL is the company's historical default rates for each level of number of days past due by the company's customers, which is depended on sales payment analyzes over the 36 months before December 31 2021 and the corresponding historical credit losses that have been incurred during this period
- In order to determine losses related to customer balances, notes receivables, and contract assets, the minimum allowable loss in case of failure (Loss Given Default) for each balance at risk is 100% due to the lack of any guarantee with the company.
- The amount that the debtor owes to the company at the time of the failure to pay is known as the balance exposed to failure (Exposure at Default), and the clearing is recognized in the statement of financial position between the balance of the debiting customer and the balance of the same crediting customer, the balance exposed to failure is determined as the unpaid balance on the date of the report, including any interest accrued till the date of the report.
- Egyptian Accounting Standard No. (47) Requires that the purpose of estimating ECL is not a worst-case scenario or a best-case scenario estimate. Instead, the ECL estimate should always reflect the probability that credit losses will occur, even if the most likely outcome is no credit losses. Therefore, the company applies macroeconomic scenarios to expected credit losses, where historical loss rates are adjusted to reflect current and future information about macroeconomic factors that affect the ability of customers to settle outstanding debt balances. The company has determined that the gross domestic product and the current account balance as a percentage of the gross domestic product and the annual change in the rate of inflation "average consumer prices" in the Arab Republic of Egypt, which is the country are sale the goods and the services so these indicators are the most relevant factors and thus adjust the loss rates historical based on expected changes in these factors.

4.10 Provisions

A provision is recognized in the balance sheet when the Company has a present or legal or constructive obligation as a result of past events, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are reviewed at the date of preparing the financial statements and adjusted when necessary to show its best estimate.

4.11 Taxes

- Income Tax

Income tax is a tax on the Company's profit and is calculated according to the relevant laws, regulations, and instructions that are currently being implemented in this regard while using the prevailing income tax at the date of preparing the balance sheet. The tax on income should be reflected in income statement.

- Deferred taxes

Deferred tax occurs to reflect the existence of some temporary differences due to the difference in time frames when the current value of assets and liabilities are recognized between the prevailing taxation principles and accounting principles that are adhered to when preparing the financial statement.

The deferred tax is determined according to the prevailing method used to settle the present value of assets and liabilities. It should be taken into account that the deferred tax maybe considered an asset of the company if there is a possibility that it may be used to reduce the accrued tax profits of the company for future years, and the amount of the deferred tax considered as an asset of the company is reduced by the amount that may not be off-set against future taxes.

Misr Cement (Qena) Company (S.A.E)
Separate interim Financial statements For The period Ended March 31, 2022

Translation of financial statements
Originally issued in Arabic

4. Significant accounting policies (followed)

4.12 Accounts Receivable, notes receivable, debtors and other debit balances and suppliers' advanced payment

Accounts receivable, other debit balances and suppliers' advanced payments are stated at the original invoice amount net of any(impairment) losses that is expected not to be collected by the company.

4.13 Related party transactions

Transactions with related parties are recorded in the same way as its normal operations according to the conditions stated by the company's management and on the same basis as transactions with others.

4.14 Treasury shares

Treasury shares are initially measured at cost value and are deducted from the equity in balance sheet.

4.15 Legal reserve

According to the Company's articles of association, 5% of the net profits of the year are transferred to the legal reserve until this reserve reaches 50% of the issued capital, when the reserve falls below that limit the company should start deducting it again

4.16 General reserve

The general reserve is formed from the company's profit in the previous years according to the general assembly meeting resolution; This reserve is used upon a decision from the general assembly meeting based on the proposal of the board of directors and the interest of company.

4.17 Capital reserve

The capital reserve is formed by the amount of capital gains and the fixed assets endowed to the company.

4.18 Borrowing

Borrowings are initially recognized at the received value of the consideration received. Amounts maturing within a year are classified as current liabilities, unless the Company has the right to postpone the settlement for a year exceeding one year after the balance sheet date, then the loan balance should be classified as long term liabilities.

After initial recognition, interest bearing loans and borrowings are subsequently measured at amortized cost using the effective interest rate method. Gains and losses are recognized in the income statement when the liabilities are derecognized as well as through the effective interest rate method amortization process.

4.19 Expenses

All expenses including cost of sales, selling and marketing expenses, general and administrative expenses and other expenses are recognized and charged to the statement of income in the financial year in which these expenses were incurred.

4.20 Borrowing cost

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial year of time to get ready for their intended use or sale are capitalized as part of the cost of the assets. All other borrowing costs are expensed in the year in which they are incurred. The borrowings costs are represented in interest and other finance costs that company pay to obtain the funds.

4.30 Financial instruments and risk management related

The company's financial instruments are balances of bank accounts, cash in hand, Receivables & Notes Receivables, Debtors & other debit balances, creditors and other credit balances. The following shows the risks related to the financial instruments and the procedures continued by the company to minimize the effect of such risks:

A. Credit risk

This risk is represented in the disability of clients to pay their outstanding liabilities, this risk is considered limited as the clients have a solid credit history.

B. Liquidity risk

The liquidity risk is represented by factors that impact the repayment of amount or all of the company's commitment according to the company's policy the suitable policies are taken to decrease the risk level to the minimum.

C. Interest rate risk

Interest rate risk is represented in the change in value of financial instrument due to the fluctuation of the market interest rates. This risk is considered limited as the company depends on its own resources in financing its financial needs to pay its current obligations and finance the fixed assets.

D. Foreign currency risk

The foreign currency risk is the fluctuation of currency exchange rates since that affect the company's open receivables and payables balance in foreign currency also asset and liability evaluation in foreign currency. Also, as it is indicated in note (2A) the assets and liabilities in foreign currency are evaluated using the official rate in the date of preparing the financial statements.
